

Sudhir Reddy Dundi

QA Engineer | Python | Selenium | TestNG | Manual Testing | Embedded Systems | Mobile Testing

dundi.sudhir@gmail.com | +91 8367564675 | www.linkedin.com | Chennai

Profile

Results-driven QA Automation Engineer with 3+ years of experience in automation and manual testing across web, mobile, embedded systems, and smart wearable devices. Skilled in designing scalable test strategies, developing automation frameworks, and executing end-to-end testing to ensure software quality and reliability. Proficient in Selenium Web-driver, Java, TestNG, functional testing, regression testing, API validation, and defect life-cycle management. Proven expertise in delivering quality assurance solutions for global clients including Google, Meta Platforms, and Abbott Laboratories. Experienced in validating device behavior, mobile applications, multimedia features, connectivity modules, and embedded systems against business and technical requirements. Strong expertise in Agile methodologies, SDLC, STLC, and cross-functional collaboration to deliver projects within deadlines. Recognized for driving quality improvements through automation, reducing manual effort, and improving regression turnaround cycles.

Education

B-Tech, Chalapathi Institute of Engineering and Technology
Electronics and Communication Engineering |
(Percentage: 79%)

2018 – 2022

Intermediate, Sri chaitanya jr college
(Percentage: 94%)

2016 – 2018

10th Class, Z P H S
(Percentage: 88%)

– – 2016

Skills

Automation Testing

Selenium Web-driver, TestNG, Test Automation Frameworks, Xts Automation

Manual Testing

Functional Testing, Regression Testing, Usability Testing, API Testing, End-to-End Testing

Programming Languages

Java, Python, C

Tools & Technologies

JIRA, ADB, Linux, MySQL, Power BI

Methodologies

Agile, Scrum, SDLC, STLC, Defect Management

Tools and IDEs

Eclipse | IntelliJ IDEA | VS Code | JIRA | MySQL Workbench | Postman | Git

Professional Experience

HCL technologies Limited, *Software Engineer*

08/2022 – present

Google Wearables – Smartwatch Validation Project

- Worked on client project for Google as part of the XTS Automation Team for smart watch quality validation and certification testing.
- Executed test suites across CTS, STS, WTS, CTS-V, and WTS-V modules for smart watch platform compliance.
- Tested smart watch sensors including accelerometer, gyroscope, heart-rate monitoring, motion sensors, and GPS functionality.
- Performed vulnerability, compatibility, and security testing to validate device readiness and platform compliance.
- Validated smart watch integration with Fit-bit including sync behavior, health metrics, notifications, and wearable connectivity.
- Ensured high product quality through detailed manual and automation testing of wearable releases.

Meta Oculus

- Developed and integrated features for Meta Oculus, a collaborative project with RayBan, enabling users to stream videos, capture photos and videos, listen to music, make calls, send messages across platforms, and connect with the MWA app for photo storage.
- Utilized ADB commands for flashing new builds to both the app and the glasses, ensuring seamless functionality and user experience.

Smart Devices & Mobile Application Testing

- Designed and executed comprehensive test plans, test cases, and validation strategies aligned with business and system requirements.
- Performed functional, regression, usability, and end-to-end testing for smart devices and mobile applications.
- Validated multimedia, camera, communication, connectivity, messenger, calling, and wearable integration features across multiple releases.
- Automated repetitive regression scenarios using Selenium Web-driver, Java, and TestNG, improving execution speed and test coverage.
- Utilized ADB commands for flashing builds, debugging applications, and ensuring build readiness before test execution.
- Logged, tracked, prioritized, and verified defects using JIRA while collaborating closely with development teams for quick resolution.
- Contributed to on-time project delivery while maintaining high quality and release stability.

Certifications

- Python – University of Michigan
- AWS S3 Basics – University of Michigan

Client Experience Summary

- Google – Smartwatch / Wearables Testing
- Meta Platforms – Smart Glasses / Mobile App Testing
- Abbott Laboratories – Medical Device / Embedded QA Testing
